THE STATE MEDICAL FACULTY OF BANGLADESH

1st Year Final Examination of Diploma in Medical Technology course, January-2021

Subject: Basic Human Anatomy (Paper-IV)

Full Marks-100 Time 3 hours

Pass Marks-50

All question carry Equal marks.

Answer any four from each Question.

Q-1	(a)	What is cell division? Write down the differences between mitosis and meiosis.
	(b)	Classify epithelial tissue with examples.
	(c)	Write down the compositions and functions of bone.
	(d)	Mention the characteristics of synovial joint (Use diagram).
	(e)	Classify blood vessels. What are the differences between artery and vein?

Q-2	(a)	Name the curvature of vertevral column. What are the functions of kidney?
	(b)	Name special sense organs and mention their functions.
	(c)	Enumerate the movements of shoulder and elbow joints.
	(d)	Describe the type of muscles with their functions.
	(e)	Mention the sites of recording arterial pulse.

Q-3	(a)	Name the endocrine glands of the body. Name the hormones of pituitary gland.
	(b)	Draw and label neuron.
	(c)	Name the type of circulation. Give the pathway of systemic and pulmonary circulation.
	(d)	Classify nervous system. Name the different parts of brain.
	(e)	Give the boundary and content of mediastinum.

Q-4	(a)	Name the special sense organs of our body. What are the layer of retina.
	(b)	Write down the bones of superior and inferior extremities
	(c)	What is porta hepatis? Name the structures passing through it.
	(d)	Name the cranial nerves according to order with their type.
	(e)	What is nephron. Draw and label different parts of a nephron.

Q-5	**Write short notes on:**	
	(a)	Nucleus
	(b)	Menstrual cycle
	(c)	The Diaphragm
	(d)	Cerebrospinal fluid(CSF)
	(e)	Lymph node

THE STATE MEDICAL FACULTY OF BANGLADESH

1st year Final Examination of Diploma in Medical Technology Course, January-2022

Subject: Basic Human Anatomy (Paper-IV)

Full Marks: 100 **Time: 3 Hours**

Pass Marks: 50

All question carry equal marks.

Answer any four from each question.

Q-01	(a)	What do you mean by anatomical position?
	(b)	Name 5 systems of the human body.
	(c)	Name 5 Example of connective tissue in our body.
	(d)	What is cell division? Mention 3 differences between mitosis and meiosis.
	(e)	Mention the layers of skin.

Q-02	(a)	Name bones of upper limb.
	(b)	Name muscle of lower limb
	(c)	Write down the characteristics of synovial joint.
	(d)	Draw and level the parts of urinary system.
	(e)	Name the internal genital organ of female reproductive system.

Q-03	(a)	What is nephron? Draw and label of different parts of nephron.
	(b)	What is joint? Classify joints with example.
	(c)	Define exocrine and endocrine gland. Name endocrine glands present in human body.
	(d)	Name special sense organs of our body. What are the functions of skin?
	(e)	Name branches of external carotid artery.

Q-04	(a)	Draw and label different parts of stomach. Give blood supply of stomach.
	(b)	Write down the differences between artery and vein.
	(c)	Classify nervous system. What are the parts of brain?
	(d)	Give names of cranial nerve with their functional type.
	(e)	Name the type of circulation. Give the pathway of systemic and pulmonary circulation.

Q-05	Write short notes on-	
	(a)	CSF.
	(b)	Placenta.
	(c)	Porta hepatis.
	(d)	Stomach bed.
	(e)	Neuron.

THE STATE MEDICAL FACULTY OF BANGLADESH

1st Year Final Examination of Diploma in Medical Technology Course, January-2023

Subject: Basic Human Anatomy (Paper-IV)

Full Marks : 100 Time : 3 Hours

Pass Marks : 50

All questions carry equal marks.

Answer any four from each question.

Q-01	(a)	Classify epithelial tissue with examples.
	(b)	Give the regions of the abdomen with diagram.
	(c)	Write down the characteristics of synovial joint.
	(d)	Mention the function of the lungs . Write down the difference between right and left lung.
	(e)	What is nephron? Draw and lebel differents part of nephron.

Q-02	(a)	Name the different parts of the brain with diagram.
	(b)	Write down the difference between artery and vein.
	(c)	Define neuron. Draw and label different parts of a neuron.
	(d)	Write down the bones of superior and inferior extremities.
	(e)	Give the classification and function of connective tissue.

Q-03	(a)	What are the content of pelvic cavity?
	(b)	Name major openings of diaphragm. What are the structures pass through these openings.
	(c)	Draw and lebel a typical intercostal space with its content.
	(d)	What is repiratory membrane?
	(e)	Describe anatomy of heart in short.

Q-04	(a)	Name organs of urinary system. What are the functions of kidney.
	(b)	Write contents of hypogastic region of abdomen.
	(c)	What are the difference between prokaryotic and eukaryotic cell?
	(d)	Name parts of intestine. Give differences between small intestine and large intestine.
	(e)	Describe blood supply of stomach.

Q-05	Write short notes on-	
	(a)	Stomach bed
	(b)	Porta hepatis
	(c)	spinal cord
	(d)	Lymph node
	(e)	Pancreas

THE STATE MEDICAL FACULTY OF BANGLADESH

1st Year (New) Final Examination of Diploma in Medical Technology Course, January-2024

Subject: Basic Anatomy (Paper- II)

Short Answer Question (SAQ)

Full Marks: 80 Time: 2:30 Hours

Pass Marks: 48

N.B: Answer any four from each question. Each question carries equal marks.

Q.01	(a)	Name major openings of diaphragm. What are the structures pass though these openings?
	(b)	List 5 differences between artery and vein.
	(c)	Define joint. Classify joints according to structure & one example of each.
	(d)	What is nephron? Draw & label a nephron.
	(e)	Classify bones according to size and shape and give one example of each variety.

Q.02	(a)	Define cell. Draw and label human cell.
	(b)	Write down differences between skeletal, Cardiac and smooth muscle.
	(c)	What is lymph? What are the parts of lymphatic system?
	(d)	What is hormone? Name the hormones of pituitary gland.
	(e)	Give the region of abdomen with diagram. Give the contents of hypogastric region.

Q.03	(a)	Describe bronchial tree with diagram.
	(b)	What is neuron? List the differences between axon and dendrite.
	(c)	Define bone. Mention composition and function of bone.
	(d)	Name the differences between large and small intestine.
	(e)	What is cell division? Mention differences between mitosis and meiosis.

Q.04	**Write Short notes on:**	
	(a)	Mitochondria.
	(b)	Spinal cord.
	(c)	Salivary gland.
	(d)	Knee joint.
	(e)	Valves of heart.

THE STATE MEDICAL FACULTY OF BANGLADESH

1st Year (New) Final Examination of Diploma in Medical Technology Course, January-2024

Subject: Basic Anatomy (Paper II)

Subject Code: 102

Multiple Choice Questions (MCQ)

Full Marks: 20 Time: 30 Minutes

Pass Marks: 12

N.B: Read all the question options and fill up the circle 'T' for true and 'F' for false against each question in MCQ answer script.

01. The mediastinum is the region between.
a) Lungs and heart b) Two pleural cavities
c) Chest and abdomen d) Heart and pericardium
e) Pleura and peritoneum

03. Function of cell membrane includes
a) Cell communication b) Digestion of protein
c) Synthesis of fat d) Maintain electric potential
e) Acts as a barrier

05. Which are granulocytes
a) Eosinophil b) RBC
c) Neutrophil d) Basophil
e) Lymphocyte

07. Which is a part of nephron
a) Tubulin b) Loop of Henle
c) Gilson's capsule d) Efferent vanules
e) ZGlomerulus

09) Correct terminology about organs-
a) Liver - Hepatic b) Stomach - Gastric
c) Heart - Pulmonary d) Kidney - Cerbral
e) Caudal - Tail

11) Thoracic cage formed by
a) Clavicle b) Sternum and costal cartilage
c) 12 thoracic vertebra. d) Lumber Vertebra
e) 12 pairs of rib

13) Parts of eye ball are
a) Vestibul b) Cornea
c) Retina d) Tympanic membrane
e) Lense

15) Stomach bed formed by
a) The diaphragm liver b) Andominal aorta
c) Spleen d) Pancreas
e) Liver

17) Characteristics of right kidney are
a) Shorter in size b) Wider in width
c) Slightly higher d) Pyramidal shape
e) devoid of nepron

19) Example of pneumatic bone
a) Maxilla b) Patella
c) Hip bone d) Ethmoid
e) Femur

02. Body buffer system includes
a) Silicate buffer b) Protein buffer
c) Bromide buffer d) Phosphate buffer
e) Bicarbonate buffer

04. Which are part of connective tissue-
a) Collagen fibre b) Keratin fibre
c) Reticular fibre d) Niacin fibre
e) Elastin fibre

06. Which is considered as somatic sense-
a) Smell b) Equilibrium
c) Taste d) Touch
e) Pain

08. Which are not a part of male reproductive tract
a) Epididymis b) Ejaculatory duct
c) Urethra d) Fallopian tube
e) Cervix

10) Contents of hypogastric region-
a) Prostate b) Uterus
c) Rectum d) Kidney
e) Pancreas

12) Which are the true statements
a) Vision - ear b) Smell - nose
c) Hearing - eye d) Taste - tongue
e) Touch - skin

14) Bones cell are
a) Osteocyte b) Osteoblast
c) Chondroblast d) Osteoclast
e)Chondrocyte

16) Hepatobilliary system composed of
a) Liver b) Gystic duc
c) Spleen d) Gall bladder
e) Porta hepatis

18) Which are membranous organelles of cell
a) Nucleus b) Ribosome
c) Centrosome d) Endoplasmic reticulum
e) Mitochondria

20) Secondary lymphatic organs-
a) Thymus b) Red bone marrow
c) Spleen d) Tonsil
e) MALT

THE STATE MEDICAL FACULTY OF BANGLADESH

1st Year (New) Final Examination of Diploma in Medical Technology Course, January-2025

Subject: Basic Anatomy (Paper-II)
Short Answer Question (SAQ)

Full Marks: 80 Time: 2.30 Hours

Pass Marks: 48

N.B: Answer any four from each question.
Each question carries equal marks.

Q.01	(a)	Draw and label a typical human cell. Write down the difference between mitosis and meiosis.
	(b)	Draw and label a typical intercostal space with its content.
	(c)	Define Bone. Give the morphological classification of it.
	(d)	What is Neuron? Give the differences between axon and dendrite.
	(e)	Define exocrine and endocrine gland. Name five (5) endocrine glands present in the human body.

Q.02	(a)	Give the classification and function of connective tissue.
	(b)	Draw and label urinary system. Write down the function of kidney.
	(c)	Draw and label nine abdominal regions. Write down the contents of hypogastric region.
	(d)	Mention the layers of skin. Write down the function of skin.
	(e)	Classify nervous system. Name the different parts of brain.

Q.03	(a)	Mention the function of the lungs. Write down the difference between right and left lung.
	(b)	Write down the function of liver. Give the boundary and content of middle mediastinum.
	(c)	Give the differences between small and large intestine.
	(d)	What is nephron? Draw and label different parts of nephron.
	(e)	Name the types of circulation. Give the pathway of systemic and pulmonary circulation.

Q.04	Write Short notes on:	
	(a)	Stomach bed.
	(b)	Knee joint.
	(c)	Placenta.
	(d)	Menstrual cycle.
	(e)	CSF.

THE STATE MEDICAL FACULTY OF BANGLADESH

1st Year (New) Final Examination of Diploma in Medical Technology Course, January-2025

Basic Anatomy (Paper-II)
Subject Code: 102
Multiple Choice Questions (MCQ)

Full Marks: 20
Pass Marks: 12

Time: 30 Minutes

N.B: Read all the question options and fill up the circle 'T' for true and 'F' for false against each question in MCQ answer script.

01. The pleura are:
a) Covering by heart
b) Two layer
c) Covering by lung
d) Formation of water
e) Formation by double serous membrane

02. Part of large intestine:
a) Duodenum
b) Anal canal
c) Ileum
d) Sigmoid color
e) Caecum

03. Male genital organ includes -
a) Testis
b) Ovary
c) Scrotum
d) Epididymis
e) Clitoris

04. Adrenal medulla secretion hormone
a) Glucagon
b) Calcitonin
c) Epinephrine
d) Cortisol
e) Nor-epinephrine

05. Female genital organ consists-
a) Ureter
b) Vagina
c) Urethra
d) Clitoris
e) Ovary

06. Covering of brain are -
a) Three layer
b) Dura mater
c) Arachoroid
d) Two layer
e) Pop mater

07. About Ribosome which are correct –
a) Membraneous organalles
b) Small electron dense particles
c) Contains iRNA
d) It Produces ATP
e) Main function is protein Synthesis

08. Skeletal Muscle differs from smooth muscle-
a) Striation present
b) Multiple nucleus
c) Skeletal muscle present in viscera
d) Has voluntary movement
e) Innervated by autonomic nerve

09. About Rib-
a) It is flat bone
b) Anterior articulation with vertebrae
c) Total 10 in number
d) Floating ribs-11th and 12th
e) True Ribs-1st -7th

10. About Heart-
a) It is hollow muscular organ
b) Present in posterior mediastinum
c) AV node is the pacemaker of heat
d) Aortic Valve is semilunar valve
e) Fixed part is the base of the heart

11. Membranous organelles of the cell include
a) Ribosome
b) Proteosome
c) Mitochondria
d) Lysosome
e) Microtubules

12. Structures passing through Aortic opening
a) Inferior vena cava
b) Oesophagus
c) Aorta
d) Azygos vein
e) Thoracic duct

13. Artery differs from vein
a) Thinner wall
b) Has valves
c) carry blood at high pressure
d) Has rapid blood flow
e) Collapse after cut

14. Sensory cranial nerves are
a) Vagus
b) Olfactory
c) Optic
d) Trigeminal
e) Vestibulocochlear

15. Pancreas is the
a) Accessory gland of digestive system
b) Only exocrine gland
c) Only endocrine gland
d) Temporary exocrine gland
e) Mixed gland

16. The parts of the small intestine are
a) Duodenum
b) Ascending colon
c) Caecum
d) Jejunum
e) Ileum

17. The following statements about true about kidney
a) It is intra peritoneal organ
b) Two in number
c) Forms urine
d) Has haemopoietic function
e) Part of the pelvic cavity

18. Mixed type cranial nerve includes-
a) Olfactory
b) Trigeminal
c) Vagus
d) Facial
e) Accessory

19. Endocrine glands are-
a) Pituitary gland
b) Salivary gland
c) Mammary gland
d) Testis
e) Pancreatic acinar gland

20. Epidermis includes -
a) Stratum corneum
b) Papillary layer
c) Reticular layer
d) Stratum spinosum
e) Stratum basale
